

## REQUIRED SAFETY EQUIPMENT

Foot Protection

Protective Clothing

Hearing Protection

Eye Protection

Hand Protection

Shock Protection

## SAFETY FIRST

If you are collecting the equipment for someone else please make sure this sheet is given to the equipment user to read. This sheet should be given to the site supervisor if the equipment is being hired for commercial use so that the information is available to all users.

**Before starting any job, be sure to spend a few minutes planning and understanding the hazards and risks of the job. Do this by:**

- Thinking about and observing your surroundings
- Running through the steps of the job in your mind
- Identifying the hazards, how you can get hurt and how you'll prevent it
- Knowing what plant and equipment you need
- Only starting when you can do the job safely
- Ensuring you are trained or experienced for the task
- Communicating with everyone involved

**Points to consider when planning a task. Can you:**

- Come into contact with an energy source (e.g. heat, electricity, substance under pressure) or hazardous materials
- Be struck-by or against anything?
- Be caught-in, on or between anything?
- Slip, trip or fall on the same or too a lower level
- Strain or sprain a muscle?
- Cause damage to plant equipment or property?
- Spill or pollute something?

# Breaker Concrete Hydraulic (Hand Held)

## Instructions for Use

### Pre-Start Checks and Safety

- Ensure that the Hydraulic hose is free of damage and defects
- Check the Breaker is damage free
- Make sure the Hydraulic hoses are clean, are connected to the power Pack correctly and locked into position
- Make sure the bit (chisel/point) is locked into position correctly and locking lever shut

### When Operating

- Use appropriate PPE
- Ensure all by standers and assistants are aware of work proceedings
- Operate the Breaker in a comfortable safe manner

### Starting Procedure

- Once the Power Pack is running and connected to the breaker pull down the "dead mans" lever to operate

### Stopping and After Use

- Depress the "dead mans" lever
- Turn off the Power Pack
- Disconnect the Hydraulic lines
- Make sure the connectors are clean and dust free
- Place the Breaker back on top of the Power Pack
